

# SPECIFICATION

- A Boom High Lift Position, Standard dipper arm and bucket
- B Boom High Lift Position, Extended dipper arm and standard bucket
- C Boom High Lift Position, Standard dipper arm and deep dig bucket
- D Boom High Lift Position, Extended dipper arm and deep dig bucket
- E Boom Deep Dig Position, Standard dipper arm and bucket
- F Boom Deep Dig Position, Extended dipper arm and standard bucket
- G Boom Deep Dig Position, Standard dipper arm and deep dig bucket
- H Boom Deep Dig Position, Extended dipper arm and deep dig bucket

Digging Bucket Widths 8" 13" and 16" Material Handling Bucket 24"

## POWERFAB 125

The standard machine is fitted with a 5 HP air cooled petrol engine. An alternative petrol or diesel engine may be fitted up to 12 HP size which will provide a relative increase in hydraulic capacity.

The machine may be easily towed on a Powerfab or similar trailer by the average family saion car or transported in a transit type van.

All hydraulic cylinders are identical. When holding spare items in stock one cylinder only will be required to cover the five cylinders used on the machine.

Although the digger power pack may be used to power ancillary equipment, a range of independant hydraulic power packs are available. These are powered by engines ranging from 5 HP to 12 HP supplying varying hydraulic output in pressure and flow.

This versatile and manoeuvreable machine will amaze you with its ability to do those compact size tough jobs which the big rigs cannot get in to do. The adjustable two position front stabilizers will enable you to dig alongside a wall and to pass the machine through a narrow opening such as a doorway or gateway. The range of buckets and optional extra attachments available increase the scope of the machine and any new adaptation that may be required, will be considered by our Technical Sales Department.

By being able to totally eliminate the need for a pick and shovel, you will be able to save yourself money, manpower and time in your own job and obtain extra money by doing outside jobs.

The all steel welded construction of the machine offers quality right through to the heart of the system which assures long dependable performance under normal working conditions.

This machine is ideal for Builders, Plant and tool hire; Gas, Water and electricity pipe and cable laying, Cemetary grave digging, Farmers, Nurseries, Estate owners, Golf courses. In fact anyone with a digging job to be done.

Patents Pending.

For further detailed information, refer to the technical information and price list sheet.
